

- **319: Mini AudioStix, 3.5mm Stereo to Balanced Line Level & 20dB Pad**

Switchcraft's new 319 AudioStix is a high quality, compact adaptor for connection of an unbalanced 3.5mm stereo jack audio output (such as laptop, MP3, CD player, etc) to balanced mono line level terminal block.

The unit's built-in isolation transformer and ground lift will ensure that any buzz or hum noise on the system is significantly reduced for crystal clear sound, whilst the 20dB Pad Switch will ensure required signal level is not exceeded.

The Switchcraft AudioStix product range:

The latest additions to Switchcraft's expanding line of premium pro audio products, AudioStix are ideal 'compact audio Secret weapons' for the AV installer or audio system engineer.

Each of the adaptors can be used stand-alone, rear-mounted into the Switchcraft QGPK Series rack panels or permanently installed within a system rack or faceplate application.
