

- **367R:** Mini AudioStix, AES-EBU Impedance Adapter 75-110 Ohm, BNC-XLR

Switchcraft's new 366R AudioStix is a high quality, compact impedance adaptor for conversion of a 75 ohm BNC to 110 ohm XLR audio output.

The unit's built-in isolation transformer will ensure that any buzz or hum noise on the system is significantly reduced for crystal clear sound.

The Switchcraft AudioStix product range:

The latest additions to Switchcraft's expanding line of premium pro audio products, AudioStix are ideal 'compact audio Secret weapons' for the AV installer or audio system engineer.

Each of the adapters can be used stand-alone, rear-mounted into the Switchcraft QGPK Series rack panels permanently installed within a system rack or faceplate application.

Features:

- XLR Female to BNC (366R)
- BNC to XLR Male (367R)
- Adapts 75 ohm (BNC) to 110 ohm (XLR)
- Transformer Isolation
- Use individually or rear mount into our QGPK Series Rack Panels
