

• **91378365: Indoor Touch - Access Control Touch Screen Panel, Android OS**

The **91378365 Indoor Touch** is 2N's latest luxury door communication system for use as part of a remote communication and door entry system.

This 7" **HD touch-screen control panel** is for indoor use, to be integrated with 2N's wide range of **IP-addressable Door Entry and Intercom Systems**.

Using a highly intuitive, Android-based operating system, the user has the ability for 2-way communication with visitors to the door before allowing access – with HD video images and high quality audio of any visitors. If the user is happy to allow the visitor in, they can remotely unlock internal / external doors (using IP-addressable remote door locks), switch on corridor lights, etc – ideal in apartment living, large homes or buildings where the visitor does not need to be met at the door.

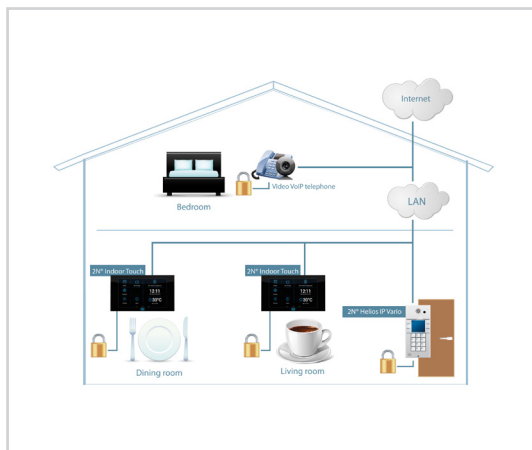

The stylish and elegant Indoor Touch user interface allows 2-way communication with IP door intercom systems, VoIP telephones/videophones, or other Indoor Touch devices on the same network, simply at the touch of an on-screen button. The device/control system will also allow for integration with other third-party IP controlled devices to provide remote, touch-screen control of building management systems such as lighting, heating, curtains, etc.

The **2N Indoor Touch** is intended for interior use only (normally wall-mounted internally at strategic door positions) and is ideal for integration as part of a 2N IP Helios Vario or Verso Door Entry system.

Ideal for use in apartment complexes, home automation systems, modern interiors, large villas and high specification office environments.

**Features:**

- Luxury door entry / communication touch screen
- IP addressable for use with 2N range of IP Intercom and Door Access products
- HD 7" touchscreen with energy saving mode
- Android operating system; Simple to use, control and configure
- High definition view of visitors at the door
- Remote door unlocking
- Receive video and audio from connected indoor / outdoor Access / Intercom Terminals
- Two-way communication with other touch screens or devices on the network
- Integration with third party IP controlled devices such as lighting and heating
- Easily integrates with SIP Systems
- Power supply via PoE or adapter
- Stylish, elegant design, Finished in black

**Specifications:**

<b>Model:</b>	<b>91378365</b>
Power	External power adapter 12V DC 2A / PoE 802.3af
Screen	7" high-capacity touchscreen 16:9
Resolution	1024x600px 24bpp (16.7 million colours)
Status indicator	1x RGB LED (missed calls, energy-saving mode etc.)
Operating System	Android 4.2
Sound	Integrated microphone, 1 x 2W integrated speaker
LAN	Ethernet 10/100BaseT, RJ-45, Recommended cabling Cat5e or higher
Sound	Integrated microphone, 1 x 2W integrated speaker
Memory card	SD card (up to 16 GB)
Dimensions	235 (W) x 165 (H) x 40 (D) mm
Net Weight	850g
