

ELMA 609

Non-contact Infrared Forehead Thermometer

The Elma 609 is a professional non-contact infrared thermometer for safe, accurate testing of body temperature.

This non-contact solution to quickly measure body temperature, whilst promoting safe social distancing practices.

Ideal for checking family members, staff, visitors and customers before they enter the building, this professional infrared thermometer allows up to 15cm contactless distancing from the subject to be tested and, with a one-click trigger, will provide an immediate and accurate current temperature reading.

The Elma 609 infrared thermometer has two measuring ranges; body temperature of 32°C ~ 42.5°C - and object surface temperature of 0°C ~ 60°C and meets relevant medical standards such as EN 980, EN1401, EN6060-1, EN 60601-1-2 and ASTM E1965-1998.

Technical data:

Temperature body::	32.0...42.5°C
Temperature surface::	0...60°C
Resolution::	0.1°C
Distance::	5...15 cm
Battery::	2x1,5V LR03 (incl.)
Dimensions::	149x77x43 mm
Weight::	172 g
