

USB extender over Single CAT5e/CAT6 (100m) Kit

The PU-USB-KIT is a USB over CAT5/6 transmitter and receiver that has been developed to extend USB devices over long distances via CAT5e/6 cable infrastructure. This kit allows any USB host to send data within a 100m range while offering up to 4 USB outputs, giving this product the ability to act like a USB hub.

FEATURES

- Supports all major operating systems including Windows®, MAC OS®, and Linux
- Supports USB 2.0 high-speed and USB 1.1 (full-speed, low-speed) devices
- True plug and play without the need to install drivers
- Display or control the host device
- Proven up to 100m CAT5 cable distance without lag
- Each USB port carries 500mA of power
- Total transmission frequency 1 GHz
