• **AVB5: Audio-via-Bluetooth Wireless Receiver**

The new AVB5 is a low cost, simple, yet effective unit which allows wireless connection between any amplifier (or any device with a line input) and Bluetooth enabled devices, such as:

- MP3 Players
- Mobile Phones
- PC/Laptop Computers
- Microphone/Headsets

Each AVB5 unit has a unique pairing code to identify it, which is especially useful if operating multiple devices within a small area or location, the maximum operational range being 10 metres (dependent on the environmental conditions). A simple blue LED identifies when a connection to the AVB5 is successfully made.

Once paired, the unit streams the audio signal via a secure 2.4GHz A2DP protocol, avoiding any other Bluetooth enabled device within range.

Power is supplied by a 5vDC plugtop PSU (supplied) or via a USB A connection, which may be via a computer or other source with USB facility.

Features:

- Bluetooth Wireless link to amplifiers, pre-amps, HiFi, etc
- Unique pairing code to each unit
- Operating range up to 10 metres
- Powered via PSU or USB
