

• CD6208: CD Player / Multi Source Audio Player

The new **Inter-M CD6208** is more than just your average commercial CD player! This multi-source audio media player offers a whole host of clever digital audio format playback features...

Virtual 6 CD Changer:

What might seem to be a single CD player slot; but the magic of the new CD-6208 is that content from CDs can then be stored onto its internal memory card, allowing up to 6 full audio CDs to be stored, therefore providing a 'virtual' 6 CD changer.

Not only does this reduce the need for CDs to be stored onsite, but also reduces mechanical parts for improved product life and also significantly increases track / 'CD' access speed.

USB Playback:

Using the USB input on the front of the unit, the CD-6208 supports MP3 / WMA / WAV audio file playback from a USB memory stick.

CD Player:

Don't worry – let's keep things simple! It's still a conventional CD player too! Featuring 3-beam pick-up professional mechanism, this is a robust CD player for when you just want to pop in a CD and press play.

Instant Play:

The **InterM CD-6208 CD / Multi Media Player** features 10 x instant playback buttons which allow for immediate access and playback of stored audio files (ie. Using the virtual CD Changer feature). This instant playback feature is ideal for frequently used tracks, messages, audio advertising, etc.

Pitch Control and Cue:

The InterM Audio Player also features Pitch Control allowing for adjustment of playback speed of CDs, tracks stored to the virtual CD Changer, tracks stored on a USB memory stick, etc. Playback speed can be adjusted by $\pm 15\%$ in increments of 0.1%.

Cue function allows for instant start of audio track playback.

Auto Play Function:

Allows any track / audio files stored on the internal memory or a connected USB stick to be automatically be played when the CD6208 is powered up.

RS-232 Control Port:

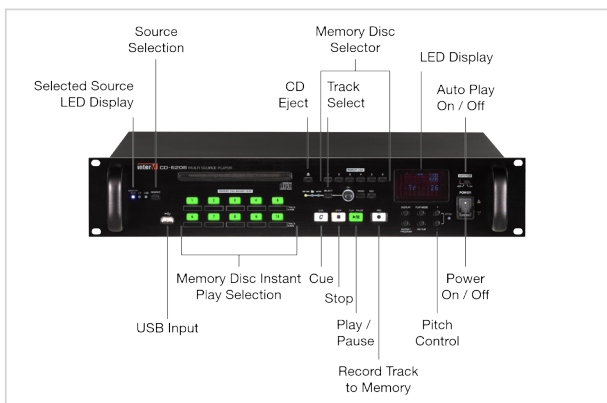

The CD6208 supports RS-232 connectivity for integration with AV control systems such as AMX / Crestron / InterM & 3rd Party control systems.

Digital and Analogue Outputs:

This multi format audio player features a variety of both digital and analogue outputs including Coax, Optical, stereo XLRs, mono XLR and stereo RCAs

Features:

- Virtual 6 CD Disc Storage
- 10 x 'Instant Key' for disc memory instant replay
- Memory Playback
- Instant / Auto Play / Pitch / Cue
- USB Drive input for audio file playback
- Supports multi-format decoder incl. CDA, WMA, MP3 and WAV
- Front Panel LED Display for Track Selection, Volume Level, etc
- High quality headphone output
- RS-232 Control port compatible with AMX, Crestron and other AV control systems
- Multi Input / Output formats including SPDIF and Optical
- STEREO(RCA,XLR), MONO(XLR) Output
- Auto Play (Selectable CD/USB/MEM)
- CUE Function
- 20-step Pitch Control

Specifications:

Model:	CD6208
Disc Formats	CD, CD-R, CD-RW
Formats	3 channels (L,R,Mono)
Number of channels	RCA: L / R, XLR: L / R / Mono
Analog Output Level (Max)	+8 dBu (2Vrms)
Frequency Response (20Hz ~ 20kHz) - CD, Pitch Off	+0.5/-1dB
T.H.D. (20kHz LPF) - CD, Pitch off	Less than 0.003% (Nor), 0.007% (Lim)
S/N (20kHz LPF, A-WTD) - CD, Pitch off	Better than 100dB (Nor), 95dB (Lim)
Channel separation (1kHz, +8dBu, 20kHz LPF) - CD, Pitch off	Better than 90dB (Nor), 80dB (Lim)
Aux 1 Input	-10dB/10k Ω , Unbal
Aux 2 Input	+3dB/10k Ω , Unbal
Optical Output	S/PDIF
Coaxial Output (RCA)	S/PDIF
Operation Temperature	-10 °C ~ +40 °C
Power Source	230v AC, 50Hz
Power Consumption	27w
Weight (Nett)	5.3kg
Weight (Gross)	6.4kg
Dimensions	482(W) x 88(H) x 280(D)mm
