

Hearing Loop Signs

As hearing loops are often out of sight, it is important to make people aware that a hearing loop is available. Signs should be clearly placed wherever there is a hearing loop installed.

The IL-SN01 has either an adhesive back or an adhesive front used for fixed loop systems.

Physical Data:

Dimensions	Width - 90mm (3.54") Height - 100mm (3.94") Depth - 0.22mm (0.01")
Weight	N/A
