

Bespoke Moulding

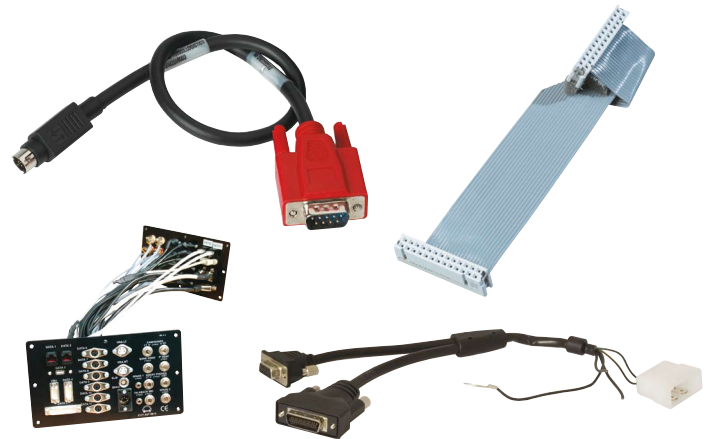

CIE's bespoke hard mouldings service provides a full turnkey solution: supporting design, tooling, sample production, manufacturing and consignment stock holding.

Stock & Bespoke Cabling

Whatever the quantity, whatever the specification, standard or bespoke, CIE are experts in the distribution, design and production of all types of cables and cable assemblies.

Developing custom solutions for applications as diverse as satellite navigation systems to bath chairs, EPOS units to military vehicles, quality and customer satisfaction are paramount. Whether your requirement is for 50 units or 50,000 units, we achieve best product, best price and best service from conception to the completion of the project.

Waterproof

We are proud of our extensive range of IP-rated connectors and cable assemblies ranging from:

- Shielded
- Compact
- Military equivalent
- DC Power
- Switchcraft EN3X Conxall

We are confident that whatever your application, whether it be marine, military, medical or process control - we have the solution for your individual needs.

Equivalent and Bespoke Connectors

CIE-Group's factory can also produce high quality equivalent and bespoke connectors to your requirements from a minimum of 1000 pieces.

Switchcraft®

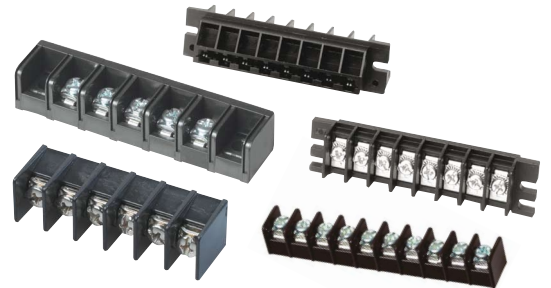

CIE-Group are proud to be the original and still the largest UK master distributor for the Switchcraft range of professional connectors, cable assemblies and patchbays.

We pride ourselves on holding the largest range of Switchcraft products in the UK, combined with our unparalleled levels of customer service and advice.

Bussmann

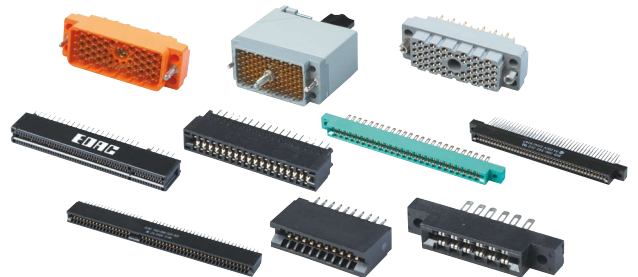

For more than 25 years, CIE-Group have been representing Bussmann's full range of industrial quality fuses and terminal blocks for the UK OEM and electronics sectors.

EDAC INC

We are also the UK's number 1 master distributor for EDAC; the world leader in Card Edge and Rack & Panel connectivity.

Strongly based on the continuing success of the fabled 516 Series, the CIE / EDAC partnership goes from strength to strength to achieve each customer's unique requirements.

HKM

With a wide range of stock and bespoke solutions, our chassis-mount loudspeakers are designed into many of the UK's leading gaming, marine and military systems.

The Company

Our specialist connectivity division is one of the most experienced members of the CIE-Group, with a long history of servicing the most diverse of industries from recording, broadcast and data/telecommunications to marine, automotive and medical applications.

Our success throughout the years has been based on both the quality and range of product combined with our unequalled levels of service. In addition to our significant stockholding, we also provide a unique technical support service with expert product advice.
