

2Way Passive Fixed Installation Loudspeaker

SE-K SERIES
SE-8K/SE-10K/SE-12K/SE-15K
SE-8T/SE-10T

Description

SE-K/SE-T Series is a 2Way Passive Fixed Installation Loudspeaker made by prominent professionals with high cost performance. By its efficient enclosure tuning and passive network tuning, the series covers a large area with powerful sound sources,

It can be fixed-installation using numerous rigging points and hole cups and also be used for portable purposes which is appropriate for various applications.

It not only guarantees high sound quality but durability as well using ANSI standardized enclosure and environment-friendly sound absorbing materials.

SE-K/SE-T is composed of four 2 way models, 8", 10", 12", 15" and two 2 way models 8", 10" which can be used with high-impedance.

SE-K/SE-T Series is made by remarkable specialists in the biggest Korean domestic speaker factory. It is highly recommended for specialists who would love to enjoy high fidelity speakers at a reasonable price!

- High efficiency EMINENCE woofer driver
- High efficiency titanium compression driver
- 90°(H)×60°(V) horn(rotatable)
- HF driver protection circuit
- 16 gauge powder coating steal grill
- Hole cups and eight M8 rigging points
- Optimized crossover design
- A selection of 8", 10", 12", 15" passive 2 way and 8", 10" high—impedance models

Features

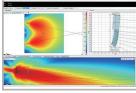

2Way Passive Fixed Installation Loudspeaker

SE-K/SE-T Series is a 2Way Passive Fixed Installation Loudspeaker made with high power titanium driver from the prominent American corporation, EMINENCE. It can be applied to various purposes as it covers a wide frequency range with high quality.

Rotatable Horn

It adopts rotatable $90^{\circ}(H) \times 60^{\circ}(V)$ horn which enables users to adjust the angle of the horn regardless of the enclosure.

Crossover&Enclosure

The enclosure tuning by computer simulation and passive network tuning provide seamless sound and expresses rich sound by flat frequency response.

Connection(SE-8K, SE-10K, SE-12K, SE-15K)

With the two Speakon terminals on the rear panel and Push Type terminals, It is easy to connect the wires and install.

High-Impedance Model(SE-8T, SE-10T)

The Series can be used in mid to large-sized venues by using high-impedance trance for 70 V/100 V. It can be switched to low-impedance(8 Ω) using a Tap. (Connection : Speakon×2, parallel connection)

Easy Installation

When used for stand mount purposes, use hole cups on the lower part of the speaker. M8 rigging points placed on every side of the panels enable connection by wires using I-type bolts or simple fixed installation with SB-30HA(optional).

The enclosure is safety rate of 10:1 by ANSI standard. The rigging point is safety rate of 5:1. These safety rates guarantees higher safety and fidelity.

Multi-purpose Speaker

SE-K/SE-T Series can be applied to various applications such as flying and pole mounting. It is appropriate to be used as a main speaker and sub speaker with four size selections of 8". 10". 12". 15".

Ease Data

perfectly suits for speaker installed applications and using the EASE Focus, simulating speaker sound pressure dispersion is possible. Inter-M provides speaker data for EASE and EASE Focus,

Recommended Amplifiers
