

• **SS40-100: 40W Suspended Loudspeaker, White**

The SS40-100 40W Suspended Loudspeaker is ideal for providing clear, intelligible voice announcements and background music in large, open plan environments such as retail, sports & leisure or warehouse / distribution.

This 40 Watt 100v line suspension speaker is finished in white and is supplied with 3 point suspension hardware to securely suspend the loudspeaker to the building structure. A separate security point is also provided on the loudspeaker rear for added safety.

An internal multi tap transformer provides a range of settings to allow optimum set up of system level/coverage @100v line as well as providing a low z 8Ω tapping as an option, adjusted via a multi position switch on the loudspeaker rear.

Cable is terminated via spring loaded binding posts.

**Features:**

- 40 Watt, 100v line/8 ohm Low Z output
- Power Tappings from 7.5 ~ 40W
- Spring-loaded binding post termination
- Secure, 3-point suspension hardware
- Durable ABS construction
- Finished in white

**Specifications:**
